LANDS FOR THE PEASANTS.

Russian Government Putting Agrarian Plan Into Operation.

St. Petersburg, Aug. 27.-The distribution of crown appanages, the first part of the administration's agrarian program, by which it is heped to win the peasantry to the support of the government at the coming elections, was put into effect today when a ukase was published transferring the 4,500,000 acres of appanage lands mentioned in the Associated Press dispatches Aug. 23 to the Peasants' bank for distribution to the peasants. The urgency of the situation is such that the ukase, which was signed the day of the attempt on the life of Premier Stolypin. was gazetted without waiting for final decision as to the method and terms of payment. The principal question, whether the latter shall be 33 or 60 transfer of 10,000,000 acres of crown to whom it is addressed. lands will be made later.

That Guerrera's force of 2,000 men is well armed and supplied with ammunition and food is amply verified. COAL ROADS ANXIOUS TO OB- SUBURB WORKED UP TO HIGH TAIN RULING.

New York, Aug. 27.—The new railroad rate law, which applies to all railroads doing an interstate business, will go into effect at midnight tonight. It will be en-forced by the interstate commerce coming to kill Joseph S. Barlow, editor of mission. According to the new law the roads were to have filed with the commission by midnight all their tariffs and charges, showing not only the full cost of transportation from point to point, but the American Eagle of Murray. Conference in Washington.

To discuss this and other points, a committee representing the big eastern railroads will go to Washington tomorrow in order to meet the commission. This conference will be attended by representatives of the anthracite coal roads, who are anxious to obtain a ruling from the commission on that section of the law which prohibits a railroad from car-rying from state to state any article manufactured, mined or produced by it except for its own use. This would in-clude coal.

Benefit to Shippers.

It is expected that shippers will find hemselves benefited by the provision which requires the railroads to include all charges of whatsoever nature in their quoted rates. Heretofore a shipper has had to figure for himself on icing, re-frigerator and elevator, charges and the dozen or more other incidentals, dickering dozen or more other incidentals, dickering with the separate companies which had a hand in transportation or care of his shipment. Now the railroads must do that, and the shipper meets but one charge and deals with but one concern. All the sources of side charges are consolidated, and private cars, side tracks, spurs, terminals and elevators are made subject to the law. subject to the law.

The new law also requires the railroads to establish a uniform system of account-ing and to keep their books open for in-spection at all times by the expert accountants of the commission. This feature is expected to go far toward abolishing the rebate evil of the past. The railroad accountants are now conferring in regard to the uniform system of book keeping, which, however, will not go into effect until June 1, next year.
